--------------	-------------------	-------------

Dear Sir/Madam,

I am seeking a Senior Business Intelligence, Data Analyst position. As you can see from my resume, I have extensive experience designing and building end to end business intelligence, visualization, and data analytics solutions using BI technologies, various database platforms, SQL, Python and other ETL and data engineering tools and platforms.

I have also worked closely with users to collect requirements, understand business goals and implement optimal solutions in various private and public sector organizations. More recently, I've gained working knowledge of data science, cloud and AI tools and technologies.

I'm confident that given the opportunity I can add significant value and technical leadership to your team. I look forward to hearing from you.

Please feel free to contact me at your convenience. Thank you for considering my application.

Sincerely,
Dan Amare
